PROFESSIONAL SUMMARY

Fullstack developer specializing in React, TypeScript, and NestJS, with strong mobile expertise and a track record of delivering secure, scalable solutions that optimize web and mobile applications.

CORE SKILLS

Software Development: React, React Native, Tailwind CSS, Front-End Features, NestJS, API Development, Back-End Features, Server-Side Rendering, Fullstack Developer, Web Application Development, Mobile Application Development, Mobile Engineering

Database & Cloud Technologies: PostgreSQL, SQL, Supabase, Cloud Services, Firebase

Architecture & Security: System Architecture & Security, Architecture Redesign, JWT Authentication, Secure Authentication

Code Quality & Collaboration: Functional Code, Code Refactoring, Code Review, Code Quality & Collaboration, Git, Pull Requests, Collaboration

Project Leadership & Delivery: Project Leadership, Coding Workshops, User Experience & Project Delivery

WORK EXPERIENCE

Polycea (Ex Polyconseil) | 2025

Full-Stack Engineer CDI

- Managed the Single Customer Identifier system and build a secure authentication flow to sync users across the company's software ecosystem
- Analyzed SCI logs to identify a 15% failure rate
- Reduced errors by 30% within one month through targeted improvements
- Developed and integrated a secure JWT based authentication system to strengthen user access and data protection
- Built a generic data table component to do server-side rendering, making sure the styling, column definition and data fetching are seamless for any future use

Racemappr | 2024–2025

Software Engineer Internship

- Increased sprint velocity by 15% by optimizing development processes and team collaboration
- Built a generic calendar component for future user events, including an AI-suggested version for goal setting
- Reviewed codebase and pull requests to enhance code quality and efficiency
- Implemented JWT authentication for unified user accounts across web and mobile platforms
- Integrated Firebase services to expand application functionality
- Contributed to a public application with a focus on scalability for a broad user base
- Developed new front-end features for web and mobile applications
- Developed new back-end features for web and mobile applications
- Utilized React, React Native, TypeScript, Supabase, Prisma, Git, Tailwind CSS, and Zod daily

Feelbat | 2023

Mobile Engineer Internship

- Improved app loading time by 40% compared to MVP
- Led architecture redesign after MVP for greater robustness
- Led front-end development of the mobile app, ensuring reusability and scalability for future growth
- Refactored the mobile application to boost stability, performance, and deliver new features
- Implemented Bluetooth pairing between the app and feelbat cracks sensors
- Collaborated closely with Product Owner and developers to enhance feature delivery
- Documented code thoroughly for readability and scalability

Epitech - European Institute of Technology | 2022–2023

Pedagogical Assistant Part-Time

- Led workshops that improved student project completion rates by 15%
- Conducted coding workshops and assessed student performance during evaluations
- Designed and supervised coding exams for students
- Supported students with programming projects
- Led talks introducing students to new technologies and tech career paths

EDUCATION

Epitech - European Institute of Technology, Paris, France | 2025

Master 2 in Computer Programming

CERTIFICATIONS

B2 English Level Cambridge Certificate (Cambridge, 2017), Google Cloud Associate Cloud Engineer (In Progress)
